81 - unit veteran | Technology enthusiast | Team player and well performing under pressure | Self improvement seeker.

EXPERIENCE

81 Technological Unit, IDF — Lead *Fullstack Engineer*

May 2021 - August 2023

Lead developer in a fullstack team using a stack of **ReactJS, Django and NodeJS.**

Active in every stage of the project development cycle including – **understanding the needs of the customer, designing the solution, software architecture design, development, testing and deployment.**

Created a leading fullstack training program used by my team and several others in the same unit as well as a team in another unit.

In charge of the team's training, technologies and workflow.

81 Technological Unit, IDF — Fullstack Engineer

January 2020 - May 2021

Developed a fullstack automation system using a variety of technologies including React, multiple virtualization solutions (such as VMWare, KVM, dockers), Gitlab's CI/CD and python.

Developed and worked on smaller scale fullstack projects. Worked on multiple POCs that required research in varied fields, such as networking, telephony and niche technologies.
